Patient's data

Surname  
Name  
Gender  
Age  
AMKA

General info

Consent given  
Hospital  
Hospital ID number  
Treating physician  
Date planned for intervention  
Date of admission

Detailed report

Patient details

Comorbidities  
ASA score  
Medications on admission

Carotid disease details

Aetiology  
Side of lesion to be treated  
Symptoms of the side to be treated  
Date of cerebrovascular event  
Symptoms territory  
Modified Ranking Score

Investigation

Investigation type  
Stenosis of side to be treated (%)  
Stenosis of other side (%)  
Type of plaque (side to be treated)  
Brain MRI / CT findings (side to be treated)  
Aortic arch type

Treatment

Date of treatment  
Operating room  
Performing physician  
Specialty of interventionist  
Type of treatment  
Open repair

Type of anesthetic  
Type of endarterectomy  
Patch  
Shunt  
Other intraprocedural events  
Other procedures  
Duration of cerebral ischemia(min)  
Drain used

Carotid stenting

Type of anesthetic  
Access location  
Access type  
Embolic protection  
Predilatation  
Number of stents  
Type of main stent  
Configuration of main stent  
Size of main stent  
Brand name of main stent

Brief description

Outcome - Discharge

Perioperative complications  
Access hematoma / pseudoaneurysm  
Cardiovascular event  
MI  
Reoperation  
Other additional info  
Date of discharge  
Condition on discharge  
Medications on discharge

Follow-up

FU 1 (30 days)

Date of FU 1  
Modality of FU 1  
Condition on FU 1  
Complications on FU 1  
Comments on FU 1

FU 1 (6 months)

Date of FU 2  
Modality of FU 2  
Condition on FU 2  
Complications on FU 2  
Comments on FU 2

FU 3 (12 months)

Date of FU 3  
Modality of FU 3

Condition on FU 3  
Complications on FU 3  
Comments on FU 3
